Logistics

Filter technology

HEPA 14

At a glance

"Thanks to Zehnder's air cleaning systems, I don't have to worry about our employees working in the open-plan office, even when the cold season starts."

Ronny Lier, Operation Center Land Manager

Reasons for choosing Zehnder Virus Shield

Always with an eye on creating the best working conditions for its employees, Schenker opted to install mobile air cleaners from Zehnder. Breathing in clean air without harmful pollution particles happens to be good for productivity, too.

Naturally, Schenker's management team felt they needed a reliable partner with extensive experience of industrial air cleaning.

Excellent service and a good working relationship were equally important to this logistics market leader. It's the reason that Schenker has been a Zehnder customer for years, relying on our air cleaning solutions everywhere in its considerable business, from its offices to its warehouses.

About DB Schenker

DB Schenker is based in Frankfurt am Main and is the leading logistics provider in the German market. Working from more than 100 locations, with approximately 15,800 employees, Schenker has an annual turnover of around 4.1 billion euros.
